

ENGLISH

YOU HAVE PURCHASED THE BEST AND MOST MODERN CURTAIN ON THE MARKET!

CONGRATULATIONS, AND THANK YOU FOR YOUR CUSTOM.

COVER JOINT FOR ASSEMBLY IF YOUR CURTAIN COMES IN TWO PIECES.

- 1.- When joining the two parts make sure that the ends marked in the same colour join together.
- 2.- Place the plates behind and screw down. Nuts and washers should be on the inside face.

HANGING THE CURTAIN

- 3.- Make sure the curtain covers the required area.
- 4.- It is advisable to hang the curtain outside the door lintel rather than inside the doorway as insects will not enter or accumulate.
- 5.- If necessary cut the curtain rod to the required length proportionally at either end so that the design remains in the centre.
- 6.- Position the hooks and hang the curtain, making sure it is straight.
- 7.- The curtain should hang about 2 to 3 cms. from the floor so that it can move freely and not be trodden on. If necessary remove any surplus chain.
- 8.- If your curtain is larger, your supplier will provide you with the chain you require together with the rods and joints.
- 9.- If you curtain is wider, proceed to transfer the strips when the join is in place so that the design is in the centre.
- 10.- So that your curtain can be hung satisfactorily we have enclosed the necessary materials with a choice of three hanging methods.

Thanks for your purchase. We are at your service through your supplier for any advice, service, suggestion or complaint you might wish to make.

HOW TO KEEP THE CURTAIN

This curtain is best washed with NEUTRAL detergents at least twice per season. There is no risk of discolouring or losing the shine. At the end of the season, put the curtain in a bag and it will be as good as new for further use.

Yours faithfully,
