

PROTECT·A·BED®

**WHO ARE YOUR GUESTS
SLEEPING WITH TONIGHT?**

Bedbugs don't discriminate between hotels or hostels. Protect-a-bed mattress encasements provide unbeatable protection against bedbugs and dust mites creating a clean and healthy sleeping environment for your guests.

PROTECT·A·BED®

Every night the human body loses at least a pint of fluid through the skin, pores and mouth, as well as millions of skins flakes – unprotected mattresses create the perfect breeding ground for bacteria and dust mites (a major cause of asthma, eczema and rhinitis).

This unique bedding protection system ensures your mattress investment will last longer:

- Scientifically proven to be bedbug entry, exit and bite proof
- Quick and easy to fit onto any mattress
- Air vapour porous, waterproof and absorbent
- Cool and comfortable to sleep on
- Machine washable
- 2 years warranty

Protect-a-bed can also be used to treat existing infestations by trapping bedbugs inside the mattress encasement where they can be treated effectively without contaminating the surrounding area and avoiding costly mattress disposal.

Protect-a-bed mattress encasements present a valuable investment for your hotel, providing reassurance for your guests that you are taking steps to prevent bedbug infestations, also helping to protect your reputation.

Even if you have never had problems with bedbugs, it only takes one guest to introduce them to your hotel. Protect-a-bed mattress encasements should be considered as a preventative measure to help avoid this growing pest problem in future and to help protect your guests.
