

# *Insect-a-clear*

## **X-FLY**

The **X-FLY** has been designed for use on the top of kitchen cabinets. Its unique slim design makes it suitable in places where a conventional machine would not be suitable.

The flies are attracted by the special ultra violet lamp(s) and they then retained by the replaceable glue board

The perfect location for **X-FLY** is on top of wall-cupboards or high flat surfaces (such as the top of fridge-freezers, shelves etc). The unit can be neatly sited behind cornice, or for kitchens without a cornice, can be fitted flush to the cupboard edge - the brushed stainless steel front being the only feature visible from ground level.

The ultra violet glow gives an added dimension to lighting in the kitchen. Visitors to your home will only appreciate the subtle glow without realising the main purpose of this attractive feature.

### POSITIONING THE **X-FLY** IN COMMERCIAL PREMISES

Do not assume that the **X-FLY** is only suitable for the domestic kitchen – it is a very effective fly control machine covering up to 140m<sup>2</sup> and is ideal for commercial premises.

The units are easily installed as mentioned in home use above or if no flat surfaces are available, this slim unit can be wall mounted.

The following features are incorporated on the *Insect-a-clear* **X-FLY**

Stylish contemporary fly killer design.

The **X-FLY** can also be wall mounted.

Stainless steel construction.

Easy servicing for the glue board and lamp(s)

Board life up to 3 months depending on environmental conditions and infestation.

Shatter resistant lamp option available.

Easy change starters.

Designed and manufactured in the UK.

Conforms BS EN 60335-1 and the European EMC directive.

2 year guarantee (except lamps, starters and glue board). Terms and conditions apply
